1st August, 1952

The Secretary  
Imperial War Graves Commission  
WOOBURN GREEN, Bucks

With reference to your WG/154/9 dated 11th of April, 1949, there are two private memorials in WARLOY BAILLON C.C. in the Somme which I should like to have authority to move and to replace in one case by a Commission headstone. The other grave already has one.

The first case is that of the grave of 4.480 Private F.H. MURPHY, plot 5, row E, grave 5 which has a private memorial erected just in front of the Commission headstone and which hides it very considerably.

The inscription on the private memorial is practically illegible and the memorial which consists of a granite cross and base is broken beyond repair.

It is evident that the grave will look tidier and will be better marked if the memorial is removed and the headstone which already exists is made more visible.

The second case is that of the grave of Captain F.M. LANG in Row C. grave 3. On this grave there is only a private memorial and no Commission headstone. The private memorial is in very bad condition and inscription on it is fast disappearing. The memorial itself is out of plumb and loose on its foundation and the cross is loose on its dowell pin.

It is suggested that it would be wiser and more economical in the long run to remove this memorial and replace it by a Commission headstone.
